? printTriangle   ♡

Language/Type: C++ for nested loops ascii art

Write a function named **printTriangle** that uses for loops to produce the following output:

```
#
##
###
####
#####
######
```

.
.
.

```
 1  int printTriangle();
 2
 3  int printTriangle(){
 4      const int LINES = 6;
 5      string hashstr = "#";
 6      for(int j = 0; j<LINES;j++){
 7          for(int i = 0; i<j+1;i++)
 8          {
 9              cout << hashstr;
10          }
11          cout << endl;
12      }
13      return 0;
14  }
15
16
17
18
19
20
21
```

Function: Write a C++ function as described, not a complete program.

🚀 **Submit**   ⚙️

✅ You passed 1 of 1 tests.   ✕

test #1:	`output`
console output:	`#`
	`##`
	`###`
	`####`
	`#####`
	`######`
result:	✅ pass
